clean-IT: Towards Sustainable Digital Technologies

Course Description:

The course clean-IT: Towards Sustainable Digital Technologies deals with the pressing issue of the impact of digitization on climate change and how to deliver sustainable digital technologies.

Experts from various organizations share their ideas about how to make digital technologies more sustainable in the various branches of digitization.

Course Topics:

- Digitalization and Climate
- Energy-efficient Algorithms and Databases
- Energy-efficient Data Centers
- Clean AI

openHPI is the education platform of the Hasso Plattner Institute (HPI) for Digital Engineering. Together with the University of Potsdam, the Hasso Plattner Institute forms the Digital Engineering Faculty of the University of Potsdam. The university's teaching focuses on a variety of practical and engineering-oriented study programs.
